Whole No. 701

Johnston—Ducholki.

A former resident of Stony Plain, Mr. Herman Ducholki, was the defendant in a breach of promise case which was heard in the Supreme Court, before Mr. Justice Ives, on Thursday last. Miss Grace E. Johnston, of Spruce Grove, alleged that the defendant in October of 1932 had promised to marry her but had failed to do so and had married another. She asked for \$4194 damages. At the conclusion of the plaintiff's case case Geo. J. Bryan, solicitor for the defence, asked that the case be dismissed on the ground that there was not sufficient corroboration to satisfy the Canadian Evidence Act.

Mr. Justice Ives reserved his decision on that point and requested the defence to proceed. At the conclusion of the evidence for the defence the case was dismissed.

W. G. K. Bloor appeared for Miss Johnston.

New Ideas on Roads.

The no-crossroads highway again. This time in Germany and actually in operation, not just on paper. The latest example of the new German speed roads run from Cologne to Bonn—20 miles. There are crossroads, of course, but they are routed under the main artery with commodious ramps built up for traffic that wishes to enter the main highway from either side. Another plan to relieve highway congestion comes from the U. S., where an engineer has proposed traffic sidings into which slowly-moving vehicles could be shunted at intervals to permit the speedier traffic to pass. Siding at half mile intervals would permit trucks, without stopping, to clear the way for the faster vehicles. Road accidents caused by cutting out of line would be largely eliminated.

Passing of an Oldtimer.

On Saturday morning last, the 24th, there passed away one of the real oldtimers of the district, Mr. John Willie, who had entered on the 89th year of his age on the 18th inst.

Deceased had come to Canada as a youngster in the year 1850, and resided in Waterloo county, Ontario. He migrated to Alberta in 1894, and homesteaded on land a short distance west of the present Comet school, where he has resided up to the time of his death. His wife Katherine predeceased him in 1905; as also had four of his children—3 boys and 1 girl.

He leaves to mourn his loss 3 sons: William, at Lacombe; Albert and Otto, at Stony Plain; 3 daughters, Mrs. Diermar, Spruce Grove; Mrs. W. Moses, Vermilion; and Mrs. P. Singer, Edmonton; there are over 40 grandchildren, and over 10 great-grandchildren.

The funeral was held on Monday from the family residence. A service was held at Immanuel Lutheran church at Rosenthal. Rev. G. Poetzsch, the pastor, officiating. Interment was made in Rosenthal churchyard.

Card of Thanks.

The John Willie family wish to thank their many friends and acquaintances for kindness and sympathy shown them during their recent bereavement; also for the floral offerings received.

Before the P. M.

Whilst a R. C. M. P. squad from Edmonton were searching a bachelor farmer's shack up in the district north for illicit liquor on Friday afternoon last, they discovered two rat pelt in the process of drying. The young man appeared before Magistrate McCulla, charged with a breach of the Game Act, and was fined \$10 and \$25 costs, or in the alternative 10 days at the Fort.

A young man from Mewas sin district appeared before the bench at the same time, on a similar charge, and was given the same penalty.

Team Never Lost, Never Tied

This is the time of year, when the hockey season is nearing a close, that members of the various teams begin to wonder where they and their playmates stand in their leagues. In doing this, it is with pleasure we note that a peep at the score book of the tallyman for Stony Plain Hockey Juniors indicates this 100-per-cent team hasn't lost a hockey game this season—AS YET.

Some of the Junior players are said to be averse to playing any more Junior games this season; but some good sporting friends of the Junior team are encouraging the Junior team to dig up their sticks and chin pads and give a performance. So it's very likely and highly probable that we'll see our good Junior team play a good game some good Sunday before Good Friday.

The School Of Experience

People learn their most important and valuable lessons in the school of experience. It is a school that opens at birth and closes with death, and there are no vacation periods. We are passing through some experience at all times, and we are imbibing knowledge, learning something as a result. It may be that, like lessons learned in school and from books, we may forget some of the lessons of experience, for a time at any rate; even more frequently we may ignore and neglect the lessons which experience has taught us; nevertheless they have left their imprint upon our minds and have influenced our lives for weal or for woe.

It not infrequently happens that a short, sharp lesson is learned never to be forgotten from some one brief experience. Something enters our lives,—it may be a great sorrow or a great joy,—which then and there alters the whole course of our lives. On the other hand, it is often the case that in order that a lesson may be effectively learned, the experience which is teaching it may be greatly prolonged in order that it may be impressed upon us in the way that is necessary. And while individuals may learn a lesson from some experience very quickly, it is usually a much slower process for communities and nations to so learn and profit by experience.

Consider the present economic upheaval throughout the world, now continuing into its fifth or sixth year. Some people, no doubt, learned valuable lessons from it during the first twelve-month of its duration; others have learned as the months and years have gone by. Communities and nations have learned some lessons, and some have, of course, learned more and faster than others. All are still learning; learning perhaps a little more thoroughly now than they were two and three years ago. But it is quite evident that the nations have not yet grasped, or at any rate accepted, the great truths which the Great Depression has been teaching any more than they grasped, or accepted, the great truths which the Great War should have impressed upon all mankind.

Possibly it is because man has not yet learned the lessons, or at least accepted the teachings of the existing depressed economic state, that the depression is so greatly prolonged and still continues. There are certain lessons which the nations of mankind must learn, and not only learn but put their learning and knowledge into practical effect, before the depression will be overcome. The longer the depression continues the more forcibly it is teaching those lessons. They are lessons being learned through a bitter experience, but it is the stupidity and unwillingness of man to learn obvious lessons that is prolonging this bitter experience.

The four years of death, horror, suffering and destruction of the Great War, together with its aftermath of trouble and losses, of which the present chaotic economic and financial situation is a part, have not taught the nations the utter futility of war. Surely they appreciate the teachings of the Great War and its outcome, but they absolutely will not take the lesson to themselves, with the result that the world is trembling to-day on the very brink of another terrible war.

But while the nations may thus be much slower than individuals to learn lessons they should learn and profit by, people in all countries are learning and in time their thoughts and their influence will direct the nation. It is, of course, much more difficult to bring a whole group of nations to accept a great truth as the result of experience than it is to get a few individuals to accept it. Individuals are now in ever increasing numbers learning valuable lessons as a result of the experiences through which they are passing,—lessons which will not be easily forgotten but which will leave their impress on several generations to come. It will take time to translate their views into community and national life and action. That evolutionary process, nevertheless, is under way.

It is inevitable, too, that out of the experiences of a transition period such as the present, many ideas and theories will be advanced in all sincerity and earnestness as the solution of existing ills. It has always been so in all transition periods in the world's history, and it will probably continue to be so at all times of marked change. The mental processes of people are quickened by the experiences through which they are passing, but in numerous cases this merely results in the adoption of faddist or extreme ideas, and these, advanced as cure-alls for existing ills, are, generally speaking, mutually destructive the one of the other.

Clear thinking, therefore, is one of the most essential requirements in times like the present. Our experiences should teach us not to act hastily. They should recall to us that we made great mistakes in the mounting days of prosperity, and they should put us on guard against committing other and equally great mistakes under the influence of a great depression. It is never wise to reach definite and far-reaching decisions beyond recall when we are either on the mountain peaks or at the bottom of the deep valleys. In a word, in the school of experience we should learn that it is most important, vitally so, that we order and control our thinking powers, and apply them to the practical problems at hand in full realization of the fact that, while there is no short cut to betterment and perfection, betterment can be obtained by practical, unforced effort, while what now may be regarded as ideal will, if and when realized, prove to be but a stepping stone to a still nobler ideal.

A man thinks he is practicing economy when he denies himself something he can't raise the money to buy.

The Strong Man in a circus gets paid for carrying five or six people, while merchants "carry" hundreds, and are often never paid.

Shortness of Breath
Weak, Sinking FeelingsMILBURN'S
HEALTH
& NERVE PILLS

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

Ask your druggist for Milburn's H. & N. Pills.

Millions Made By Forgery

But Science Has Done Much To Aid In Detection

Between the scientist and the forger a relentless battle of wits is being waged. And although the reformed crook likes telling the public that dishonesty does not pay, the forger is always one move ahead of the scientist. The Statistical Bureau of the League of Nations estimates that this lead costs society approximately twenty million dollars a year. That is the sum which forgers manage successfully to amass at the expense of the public and the State. It is only of late years that science has been called upon to co-operate with the police in the detection of forgeries. This is especially true in England, for even to-day England has nothing to compare to the elaborately equipped laboratories which the French police have at their disposal in every important town.

Until quite recently it was still possible to get away with the easiest and clumsiest form of forgery, which consists in rubbing or scraping out a figure or a name, polishing the roughened surface, and writing in a higher figure or a different name. To-day chemists have discovered that by exposing the paper to iodine vapor, the condensed iodine permeates the lacerated surface and forms a white.

This simple but infallible test requires no special apparatus, and can easily be applied by anyone. In many foreign banks handling large numbers of "travellers' cheques," which are the forgers' happy hunting ground, canners are supplied with special iodine capsules which require only the heat of a match to give off sufficient vapour to test any cheque which they may have reason to suspect.

The activity of the forger is not confined to the "old" cheque or banknote. The manufacture of spurious works of art and paintings was until recently, probably the most lucrative branch of crooked skillfulness. But it is in this field that science can be set at last to have won the upper hand. It art experts were to make full use of all the resources science has put at their disposal since the discovery of the X-ray, there need never be another faked painting on the market.

Vanishing Fortunes

American Millionaires Reduced To Five Thousand Since 1929

Large American fortunes are disintegrating, remarks Mr. Samuel Cowther in the Cosmopolitan Magazine. The five thousand millionaires who today survive the thirty thousands of 1929 will have a good chance to lose their fortunes before they die, says the writer, who observes that only one sizeable fortune, the Astor estate, is more than a hundred years old—the three really large ones, the Ford, Rockefeller and Mellon estates, being still in the first generation. To find any fortune going back more than three hundred years, he says, one must turn to the Orient. Few of the Indian potentates know how old their fortunes are: some go back more than a thousand years. They keep their wealth in gold, silver and precious jewels.—Toronto Globe.

THAT DEPRESSED FEELING
IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling puny" simply because your liver is not doing its job. Liver bile into your bowels. Digestion and elimination go both together, and your entire system is being poisoned.

What you need is a liver stimulant. Something that goes faster than salts, mineral water, oil, laxative candy or claying enema or cathartic which only move the bowels—ignoring the real cause of liver trouble.

Take Carter's Little Liver Pills. Purely vegetable. No calomel (mercury). Safe. Ask for them by name. Before substituting, see at all druggists.

Favors Mild Inflation

Adoption of a modified system of codes similar to that used in the United States, mild inflation, raising of commodity prices; state control of business from a modifying and regulating point of view, and clear thinking as a means of returning Canada to an economic state of prosperity were advocated by Premier Brownlee in addressing a banquet of the Alberta provincial board of the Retail Merchants' Association.

Construction Program

Proposed Building Undertakings Will Stimulate Industry

Canada's recovery efforts are to be strengthened in the early spring by a moderate programme of building and construction—"moderate" compared with the gigantic United States plan "because we have not their resources"—Major L. L. Anthes, president of the Canadian Manufacturers' Association, said in addressing the Canadian Hardware convention and exposition delegates at Toronto.

Major Anthes said the proposed building programme throughout the country would stimulate industry. "It is obvious that such a programme will help your business and it will help ours," he said. "It will give work to many thousands and put money in circulation.

"We believe that our export trade will continue to increase in 1934. We have turned an adverse balance into a favorable balance of very large proportions. Canadian exporting firms are putting forth extraordinary efforts to maintain and extend the markets for their goods in other countries. If their hopes are realized they will bring much business and, consequently, much employment to Canada during this year."

Apple Surprise Pudding

- 5 tablespoons Benson's Corn Starch
- 1 cup water
- 1 well-beaten egg
- 6 medium-sized apples, sliced thin
- 1 tablespoon sugar
- $\frac{1}{2}$ teaspoon ground cinnamon
- $\frac{1}{2}$ teaspoon salt
- $\frac{1}{2}$ cup Crown Brand Corn Syrup
- $\frac{1}{2}$ cup raisins
- $\frac{1}{2}$ teaspoon ground cloves
- $\frac{1}{2}$ tablespoon butter.

Cook Corn Starch blended with salt and water in a double boiler with Corn Syrup until thick, or for about 20 minutes. Add well-beaten egg. Place sliced apples in pudding dish, sugar with raisins and sprinkle with cover well mixed with spices. Dot over with butter. Four the hot sauce over all and bake in a moderate oven until apples are tender when pricked with a fork. Serve hot or cold with lemon or maple sauce, or garnish with whipped cream.

Majority Would Not Work

New York city authorities the other day began an experiment to see just what percentage of street beggars are really "deserving cases." They arrested 63 panhandlers on the streets, investigated them, and offered jobs to those who wanted them. Seven of the 63 were delighted to get the jobs. The other 56 being men who preferred to begin working, immediately were sent to jail.

Those who think only of themselves have but little or nothing to think about.

Service For Visitors

Police Interpreters Now Stationed On Streets In Paris

Police interpreters speaking four languages are now being used by the Paris police department in order to assist visitors. They are stationed at central points in Paris and are maintaining a regular daily service. Each wears a badge bearing the colors of the nation whose language he speaks. Jean Chippie, recently dismissed Prefect of Police, has maintained a school of foreign languages at the Prefecture of Police, which members of the force have been eligible to attend.

Auto designers must expect a year of big winds.

If Past 45
and "Low" and Upset
Look for Acid Stomach

HERE ARE THE SIGNS:
Nervousness Frequent Headaches
Nausea Feeling of Weakness
Indigestion Sleeplessness
Loss of Appetite Sour Stomach
Bloating Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonsful of Phillips' Milk of Magnesia in a glass of water before you get up. Take another 2 teaspoonsful 30 minutes after eating. And another before you go to bed. OR—Take the new Phillips' Milk of Magnesia Tablets—one tablet for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pain and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

Improves cooking

Retains natural flavors of meats, vegetables and fish. Adds a golden color. Keeps food tender. Makes cooking easier.

Interesting Data On Population Relative To Wheat Production And World Market For Grain

Some very interesting data on world population, relative to wheat production, and the world market for wheat, are to be found in a recent study by Prof. Werner Henckelmann, of Bonn-Poppelsdorf, Germany, says the Winnipeg Free Press. The study, which is based largely on the publications of the International Institute of Agriculture at Rome, reveals the fact that while population and production have in the past engaged in a race in which the former usually had a start, population has now dropped out of the race while production goes on unchecked, or at least the "slowing down" is as yet hardly noticeable.

The extent to which the slowing up of the natural growth of population has entered into the present wheat problem is examined and found by the author to be a cause together with the drop in per capita consumption in many countries, of the accumulation of large stocks of wheat on the world market and the heavy decline in prices. Extension of areas and technical progress in wheat production is found to have outstripped the natural growth of population and possibilities of production have proved to be in advance of marketing facilities.

The whole present generation of farmers have grown up in the belief that a continuous increase in population and along with it a continuous expansion of trade, was a "normal phenomenon" of economic development, states Prof. Henckelmann. Because men believed that unless new areas were brought under cultivation there would be a shortage in the world's food supply, whole countries and immense continental areas were opened up within the life time of the last generation. Under the illusion that consumers could be "grown" like tomatoes, provision was made for further extension of areas with increasing yield capacity in anticipation that the consumers, for whose benefit this vast machinery was being set up, would come into existence of themselves.

The findings of eminent statisticians appear to disabuse this belief. Recent investigations reveal that there is now in view a stationary condition or even a decline of population. This is not confirmed in a superficial survey of population developments in different countries and in the world, but a closer study shows that the position is one of a declining population and we are not aware of it simply because an absolute increase is still going on. This increase actually continues, in spite of the fact that the average, taking all countries together, of three children to a household, the number necessary calculated as essential for the maintenance of the same level of world population, has for some time no longer been attained.

The explanation lies in the fact of the abnormal age-grouping of the population in the countries most important for the population movement as well as in the diminished death rate. In other words, although there are fewer children by each marriage, the percentage of population in the marriageable age range is large and population increase continues as attributed to a greater number of marriages. The phenomenon of the decline in the birth rate is an international one, and in the opinion of the author, this transition from an increase to a decline in the numbers of mankind, marks a decisive turning point in the economic history of the peoples belonging to the European and American civilization. The Slav peoples have gone so far in coquacious birth restriction, he says, that the end of the natural increase of population seems to be within sight.

In the case of Germany it is shown that while in the period 1900 to 1913, the number of children to a marriage, reckoning legitimate and illegitimate together, was four. In the period, 1919 to 1923, it fell to 2.1, and in 1923 it was only 1.9 and the tendency from the two to the one-child family

is now noted. The increase in population in Germany is accounted for by the fact that 18 1/2 per cent. of the population is between the ages of 20 and 30, compared with only 9 1/2 per cent. before the war.

This abnormal age-grouping, and the relatively lower density of the older age groups, affects the mortality rate but will cease to do so when the numerous young people of to-day have become the large class of old and elderly people of tomorrow. More marriages with fewer children instead of fewer but prolific marriages will reveal an actual increase in population in the next decade, but after that the population is expected to shrink with increasing rapidity if the present low birth rate persists.

The spectre of over-population has, in the opinion of Prof. Henckelmann, and the world speculation in agriculture, the settlement policy of the overseas agricultural countries, a policy which has been framed on long views, has proved itself a fundamentally miscalculated speculation. He believes that agriculture will have in the first instance to bear the consequences of the regressive movement of population and contends that a rise in per capita consumption, equal to that taking place in the last pre-war decades, can no longer be counted upon.

Taking the long view, the author believes that the importance of European agriculture for the wheat supply of Europe is likely to become greater, while that of overseas agriculture will probably decline. It may be taken as certain, he says, that the tendency to extend wheat cultivation will not persist; there is much to show that in the next few years a change over to livestock farming will set in. "It can be no matter for surprise," concludes Prof. Henckelmann, "if within the next few years wheat growing in the overseas countries undergoes a not inconsiderable decline, and only in this way is it possible to secure recovery of world agriculture."

Blissful Ignorance

The Brockville Recorder and Times says: "As an example of what some Americans do not know about Canada may we cite a letter appearing in the New York Times in which the statement is solemnly made that Canada has in the course of constructing a canal from Georgian Bay to Hudson Bay which will materially shorten the voyage of United States vessels bound for Europe."

Best Lamb In World

Canadian People Learning To Appreciate Home Product

Canadian farmers are producers of the best lamb in the world, according to the Dominion Department of Agriculture, yet we as a people are only recently coming to appreciate this fact; our per capita consumption is just over seven pounds. In 1933 some 80,000 more lambs were slaughtered in Canada than during the previous year. Fully 85 per cent. of our lamb crop is baby grass-grown and lamb produced on luscious pastures from the Rockies to the oceans east and west.

The surplus of grass-grown lambs is put into store for consumption during the winter and early spring months. This supply is now being augmented from weekly slaughters of large grain-fed lambs produced mainly on the prairie and foot hills country and finished in Ontario. The sheep industry is being gradually but steadily organized so that a regular and steady supply of choice product is available to the housewife at all times. More lamb is being eaten each year, and as consumption increases there will be a corresponding increase in production to meet the demand.

The present is an opportune time to suggest the advisability of a slight adjustment in the family budget so as to include more lamb from week to week. It is one of the healthiest meats for a growing family and may be served hot or cold. Legs, roasts and chops provide a variety of cuts from which to select. Being a choice Canadian product that has little export outlet, increased purchases of lamb will tend to release more bacon for export as provided for under the Ottawa Conference Agreement.

Grain Feeding Is Expensive

Should Not Be Used For Low Grade Animals

In all grain feeding it must be kept in mind that the product being used is an expensive one and can under no circumstances be used in the feeding or finishing of low grade or indifferently bred animals. Not only must the animals be of approved types, but experience has clearly shown that certain kinds of farm animals greatly excel others in their ability to utilize the feeds provided. Especially is this true in connection with the feeding of grains. Poultry would probably head the list in this regard, with the pig standing a close second in its ability to manufacture feed grains into meat economically. The dairy cow, because of her ability to give off from her body immense quantities of milk during a long lactation period, would rank third, followed by beef cattle and sheep. Professor A. M. Shaw, University of Saskatchewan.

RUSSIAN ACTRESS JOINS MOVIE STAR FIRMAMENT

Here is a study of Anna Sten, Russian actress, who has broken into the Movie News Letter, with her picture, "Nana". Critics hail her as one of the brightest of the new stars because of her spectacular acting in "Nana".

W. N. U. 2025

Progress Made By West In Last Decade Has Been Mainspring Of Canadian Achievement

All-Canadian Route Best Shipping Grain Through U.S. Ports Means Heavy Loss

Not only is there no advantage to the grain-grower by shipping through United States ports, but when that is done there is a direct loss to Canadian elevators, Canadian railways, to the employees of both, to the ports of Canada and to the thousands of men engaged in the handling of Canadian traffic in these ports. There is also another serious loss to this country because an investment amounting to billions of dollars has been made in Canada in the transportation systems, canals, elevators and port equipment, none of which will be used if the old order of using United States ports for Canadian grain shipments is restored.

By Ruth Rogers

A LIGHT NAVY BLUE COAT-LIKE WOOLLEN DRESS ADOPTS CHIC "TWO-WAY" NECKLINE

Here's a stunning dress easy-to-make and inexpensive. It is a one-piece affair that wraps the figure in sheath-like slowness. You'll like its smart becoming V-neckline that can be worn buttoned to either shoulder, creating quite a novel effect.

Grayed-green ribbed woolen made the original. The wooden buttons, flame-red checked angora woolen, navy blue mossy crepe with bright red buttons and printed mossy crepe silk in brown and beige are effective schemes. Style No. 564 is designed in sizes 16, 18, 20 years, 30, 38, 40 and 42 inches bust. Size 36 requires 4 1/2 yards of 36-inch material. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Town

We are glad to note that Premier Bennett, speaking in Montreal, has arisen to the defense of the Western provinces. The necessity for this defense arises out of the frequent charges, heard in the East, that the West has been too extravagant and is, therefore, not entitled to nearly as much sympathy as it is getting to-day.

The Prime Minister thinks the West has been no more extravagant than the East. There are about 2,000,000 people west of the Great Lakes, he points out, and their task has been the task of all pioneers—the creation of new wealth. "In the past 10 years," Mr. Bennett said at Montreal recently, "that 2,000,000 people have produced in new wealth the West has been to the total debt of the Dominion. I mention this because I know how easy it is for you in this rich city of Montreal to think that 2,000,000 people might have been a little extravagant. They did as you did—they spent their money as you do—and they took themselves with costly and good conveniences, just as we have in the East, just remember that they created new wealth at an unprecedented rate."

Some persons in the East may not like to hear it, but in justice to the West it must be said that the progress made by that section of the country in the last decade or so has been the real mainspring of Canadian achievement. The growth and expansion of the West have been an inspiration to the whole country.

More than that, the West has supplied, for Eastern industry, a close-to-home market of the greatest importance. The best proof of this is found in the fact that if wheat went to \$1.50 a bushel tomorrow, industry of all kinds in Canada would leap forward like a race-horse released at the barrier. In other words, when the West is prosperous, the East is prosperous.

Let it be remembered, also, that the expenditures of the West—for the building of cities and towns and for the service and street railways and all the other things Mr. Bennett has in mind—have been made over a relatively short period. In the East, by contrast, we have secured these things over the best part of a century. The cost, in this way, was spread over a longer term and shared by more people. It bore less heavily, therefore, upon the individual and did not begin to create the immediate financial problem with which the West was faced.

Let us say something else while we are talking about the West and that is that if the East had as much get-up-and-go as can be found in the Prairie Provinces, we should be making greater strides than one sees to-day. The Westerner is a natural born optimist. Give him even a suggestion of encouragement and he'll do big things in a big way. In many Eastern communities, by way of contrast, Opportunity often knocks until its knuckles are bare and no one even takes the trouble to go to the door.—Border Cities Star.

Using Electrical Energy

Beds In Greenhouses Heated By Laying Wires In Soil

There are a number of new devices in the home and in the small manufacturing plant which make use of electrical energy. Among these new devices are the electric hot beds in greenhouses by laying the wires in the soil. Accurately controlled temperature around the seeds and roots is attainable, growth is greatly expedited and the cost has been found reasonable. The largest installation of this kind now in operation made use of 30,000 watt-hours during the past year.

Quite aside from the domestic appliances which have come to be ordinary necessities, the electric refrigerator, the hot water tank, the electric stove and the electric furnace are making use of increasing amounts of electrical energy in the home.—Royal Bank Bulletin.

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c. package. This consists of one regular trial bottle, together with a separate trial bottle—sufficient for about one week. Upon the trial bottle first, put to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your trial bottle immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Kruschen, Ltd., London, England. Imported by E. Kruschen, Ltd., Montreal.

WORLD HAPPENINGS BRIEFLY TOLD

A statue of the king will be erected at New Delhi by the Indian maharajahs.

Wider use of native flowers in Canadian gardens was urged at the closing session of the Ontario Horticultural Association's annual convention by Mr. J. A. Wilson, of Ottawa.

A national flag for Canada apparently died a parliamentary death so far as this session is concerned when the house of commons carried a motion to adjourn debate.

Enrolment in Alberta schools reached the record figure of 177,445 last year, an increase of 800 over the year before, according to the annual report of the department of education tabled in the legislature.

Germany must have a defensive air fleet unless other great powers are prepared to give up their bombing machines, said Air Minister Wilhelm Goering, of Germany, in an interview published in the Daily Mail.

The milk inquiry report prepared by the agriculture committee of the house of commons last session will be placed before the "price spread and mass buying committee" headed by Hon. H. H. Stevens, minister of trade and commerce, for review.

Provision has been made by the British Columbia government to aid farmers in securing seed grain to plant their crops this year, it was announced by Premier T. D. Pattullo. The main need is in the Peace River district. Seed will be loaned to the farmers.

Legislative sanction for a loan of \$1,500,000 to be expended in construction and repair of houses will be sought by the Winnipeg city council. A recent survey of an area in the downtown residential district revealed 3,738 persons occupied 352 houses.

Mrs. Amelia Bullock-Webster, of Malvern, England, who died recently, bequeathed a large portion of her property in Canada, the value of which is unspecified, for the purpose of providing pensions for retiring Anglican clergy in British Columbia. It was shown when the will was probated.

The Newest Hobby
It took Martin, Antiole, Brockville, unemployed man, one and one-half hours to run 150 threads through a number 3 darning needle, but he considers the time well spent in that it gives him a chance to claim honors in the Dominion-wide thread-the-needle championship. Antiole used 144 number 36 threads and six number 40 threads.

Japan now claims to lead the world in the export of cotton goods.

Fate Of Forest-Denuded Countries

The Nations Made Treeless Are Dying Nations

"A treeless nation is a decadent nation. When the forests of a country are neglected the mental and moral health of the inhabitant begin to decline."

"Nations made treeless by the hand of man are dying nations which once were great and which no longer count, and are those the forests of which have been ruthlessly exterminated."

"No matter what political cataclysm has overtaken and submerged peoples whose governments foster and care for forests, their potency remains, their vigor still endures, their racial resurrection is certain."

"Take a map of the world and look upon the peoples who gradually are perishing. Those doomed lands are treeless. They are nations which, once mighty, have become negligible."

"Once there were trees in Spain. Once China grew vast forests. So do all other lands."

"Our food and raiment begin in the living leaf. The leaf enables us to drink. There would be little sweat water in the world—little rain—except for the sheltering leaves of trees."

"Even now the forest is our heritage for us. Heed lest it be our national undoing. Where forests die, waters die. Where waters die, the fruits of the earth perish."

"And out of those mutilated and abominable wastes where ax or fire or both has passed, unguided by knowledge or common sense, are born tornadoes that devastate and kill; floods that destroy fertility, harrow the shrinking earth to the rocky ribs, and turn arable land to desert."

"Springs, once protected by the spongy mesh of roots and mosses, dry up; rivulets disappear, brooks dwindle, rivers shrink into worn and narrow channels bordered by burning boulders bare as bleached bones."

"Rains bring rushes of flood water over the parched lands, and the result is the twinkling of an eye, thunder by in devastating fury and noise, leaving behind dead springs, drying and the ghastly bones of withered rivers."

"The forest hatred inherited from our pioneers has degenerated into the stupidity of apathy. And with it the land is degenerating too."

"Next decade or so there will be no more lumber to sell."

"That's the story. It is the story of a singular creature known as the Great American Ape."

"Three hundred years ago the forests and the fertility of America were supposed to be inexhaustible. To-day vast tracts of once fertile soil are exhausted and can be bought for almost nothing. And three-fifths of the original timber of the United States has disappeared."

"When the forests go, the crops go, the fish and the game go, the woods, herds and flocks go, fertility dies, and almost nothing is left. And the people appear, stealthily one after another—Flood, Drought, Fire, Famine, Pestilence."

"The picture painted here isn't a pretty one. Nor have the colors been lurid or too thickly laid on. Alas, they have even been toned down."

"All lumbering should be under governmental control. The most drastic regulation should govern every operation which entails the felling of trees for whatever purpose."

"Always lumber will be in demand. Always there will be need of home consumption also."

"Would it be a hardship if a State law made it obligatory that a certain percentage of every farm should be planted and maintained in trees?"

"This country's well being, prosperity—yes, it's very survival lies in the swift restoration of its forests."

"Somewhere this work will have to be done, and done very soon."—Robert W. Chambers in McCall's Magazine.

SUNDAY SCHOOL LESSON MARCH 4

JESUS' TESTIMONY CONCERNING HIMSELF

Golden Text: "Come unto me, all ye that labor and are heavy laden, and I will give you rest." Matthew 11:28.

Devotional Reading: Revelation 1:12-18.

Explanations and Comments

The Testimony of Jesus' Works, 1:24. John the Baptist was imprisoned by Herod (Mt. 14:3-5), and his disciples came and told him what Jesus was doing. When John was free he had been the first to recognize in Jesus the Messiah, the Coming One, but in his imprisonment he grew doubtful, for to that caught Jesus seemed too gentle and mild in his dealings with men. Moreover in his depressed state of mind, he may have thought that Jesus was indifferent as to what might befall his herald. Evidently he began to fear that he had misled the multitude when he pointed Jesus out to them as the Lamb of God, that should take away the sins of the world. "It is a terrible moment when one who has poured out his strength in any cause is not quite sure that his sacrifice was warranted." (George Clark Peck.)

John sent his disciples to Jesus with the question, "Art thou he that comest or look we for another?" If thou art not he, where is he? John seems to mean, for he had told the people (Mt. 3:10) that "Even now the axe is laid to the root of the trees. He that cometh after me, whose fan is in his hand, will gather the wheat into his threshing-floor, and he will gather his wheat into the garner, but the chaff he will burn up with unquenchable fire."

John's disciples found Jesus busy with the very work that had disappointed John. The sick were coming to Jesus and his disciples, their coming, to the poor he proclaimed the gospel, but uttered no word about the fire or the axe. Jesus stopped his work long enough to answer John's messengers, bidding them return to John and tell him what they saw and heard; he decried of mercy to blind, the lame, and deaf, to lepers and the lame and the poor—all a fulfillment of the prophecy of the Messiah in Isaiah 35:5, 6; 61:1. "Tell your story over again and remind him of these prophetic texts. Let him study the two types and draw his own conclusion. It was a virtual invitation to Jesus and his disciples to come in the hope he would discern that, after all, love was the chief Messianic claim." (A. B. Bruce.)

Empire Settlement

Establishment of Separate Village Communities in Dominions

Empire settlement, by establishing of new separate village communities in the Dominions is the basis of a scheme contained in a report issued in London by the Empire development and research committee headed by Sir Henry Page Croft.

The plan contained in the report would create entirely new bodies of settlers in the Dominions in districts remote from settled areas. Railways would be built to reach the new settlements.

Marvels of the Human Eye By F. M. CROWE, Optometrist-Optician, Calgary

NO. 11—THE EYE IN ITS RELATION TO HEALTH

The eyes are large factors in our health and efficiency. Since Nature allows to each organ its proper share of our total nerve energy, it follows that if defective eyes use too much, other organs suffer a shortage, leaving them too weak to carry on their functions properly. Hence we often suffer ill in other organs, while the primary cause is to be found in the eyes.

The eye is the most wonderful of the five special senses, extremely sensitive and delicate and very easily thrown out of adjustment by overwork or abuse. A tired body or limb is given rest but the eye which has suffered the general fatigue of the body is often required to go on working long after the work of the day is abandoned. Do not imagine that close work, like reading, is the only time when the eyes work. Quite true, close work requires the use of extra nerve energy but the eyes are working and using nerve power every moment they are open.

The possibility of conserving human energy by correcting eye defects is greater than by any other means. These defects are usually due to the eyeball being imperfectly shaped and the muscles are involuntarily constantly trying to overcome these defects in the interests of better vision. The resulting strain can only be relieved by wearing correcting lenses.

It is not good for even normal eyes to concentrate too long on reading or sewing. Make it a habit to "look off" periodically for a few seconds and thus allow the muscles to relax and restore their nerve force. Avoid shadows and glassy paper as much as possible. Do not pervert the light to shine into the eyes but rather on the book. Reading lying down is injurious. Hold the head erect with your work fourteen or sixteen inches from the eyes. It is harmful to continue at close work if the eyes smart, water, ache or blur, as these are some of nature's warnings that there is trouble ahead. Have your eyes examined by an expert and know their condition.

(To Be Continued)

New 55¢ Size LYDIA E. PINKHAM'S TABLETS FOR WOMEN

They relieve and prevent periodic pain and associated disorders. No narcotics. Not just a pain killer but a modern medicine which acts upon the cause of your trouble. Persistent use brings permanent relief. Sold by all druggists.

Little Journeys in Science

THE SCIENTIFIC SPIRIT
(By Gordon H. Guest, M.A.)

How a backwoods doctor over a hundred years ago made discoveries which are accepted today as fundamental in the study of the human stomach, is an interesting page in the history of medical science. Dr. William Beaumont, self-taught from books available in small villages, proved that the true scientific spirit is as likely to flourish in the wilderness as in the university. When the war of 1812 broke out he joined the American army as a surgeon, and was stationed on the island of Mackinac at the head of Lake Michigan.

It was there that an extraordinary accident started him on his scientific career. Alexis St. Martin, a Canadian coureur de bois, came to the post with a frightful gunshot wound in his abdomen. The wounded man recovered under the doctor's care, but there remained an opening in his left side which resembled a window, and through which food could be observed in its course through the stomach. Dr. Beaumont at once seized this opportunity to study food after it had been chewed and swallowed.

He hired St. Martin to submit to observation, and "took the year" follow with him from one army post to another, forever peering into the "window," and making the most ingenious experiments with every kind of food available. Dr. Beaumont possessed that tremendous desire to know about things, out of which true greatness in science springs. "Year after year he observed this unusual case, and at the end of ten years, he wrote a book entitled: "Experiments and Observations on the Gastric Juices and the Physiology of Digestion."

This book made Dr. Beaumont's name famous in the world of medicine, and his unusual patient immortal. To-day text-books on physiology quote the original statements of this backwoods doctor, and many of his observations are held as the best which have yet been made on the human stomach.

Audience Was Satisfied

Did Not Know Caruso Used Record

Instead of Singing

A recent writer says his funniest experience at a banquet was when Caruso was called on to sing at one. "Caruso declined," he said, "but the people were insistent, and Caruso agreed to sing. He went behind a screen and played one of his gramophone records. The audience, spell-bound, Caruso was enjoying a quiet chat with a friend, and at the end of the song he stepped in front of the screen and, with a bow, acknowledged the storm of applause. He explained that his voice was not in good fettle that evening. The audience never knew the trick he had played."

GERMANY BACKS BRITISH PLAN FOR DISARMAMENT

Berlin.—Chancellor Adolf Hitler will join forces with Great Britain in a supreme effort to start a new movement for disarmament, it was reported here.

The chancellor, according to well-informed persons, approved a British memorandum "in principle," following a long and cordial conversation he had with Capt. Anthony Eden, British lord privy seal, at the British embassy.

It was understood Herr Hitler decided to bury whatever doubts he is reported to have had about certain features of the proposed British plan in order to strengthen Capt. Eden's hand in the latter's negotiations with Premier Mussolini in Italy shortly.

Persons close to the situation wondered whether Mussolini will join in a possible front with London and Berlin against Paris on the question of armaments.

Conversations between the chancellor and Capt. Eden will continue, and it is understood that they will touch on the British proposal of postponing any action on air forces for two years.

"This angle may prove a stumbling block to the general negotiations between the British arms expert and Hitler."

Thirty-Hour Week Bill

Arbitrary Ruling Could Not Be Applied To U.S. Industry

Washington.—Hugh S. Johnson, who has asked a lot of questions of other persons during the last few months, answered a few himself, during the course of which he told a house of representatives committee that he thought an arbitrary 30-hour week could not be applied to industry in the United States.

He went to the labor committee early in his hearing and sat by while Gerard Swope, president of General Electric, voiced similar views against Chairman William Connery's 30-hour work week bill. Both he and Swope took the attitude that hour reduction should come through the more flexible operations of N.R.A. codes.

"I think something has got to be done very promptly to shorten hours and raise wages," Johnson said, however, "and it is my intention to do more."

He explained that further shortening of hours should be in proportion to the return of business, "not in one bite, but in two or three bites."

Countess Brassey

Passing Of Second Wife Of Earl Brassey In London

London.—The famous voyages on the yacht Sunbeam by the first Earl Brassey were recalled by the sudden death in London of Sybil, Countess Brassey, second wife of the earl who died in 1918. She was 75.

Lady Brassey, five years after her marriage, accompanied Lord Brassey on the Sunbeam to Australia in 1895 on his appointment as governor of Victoria, and they returned on the yacht in 1900. She was a stepmother of Lady Willingdon, wife of the former governor-general of Canada.

New Territorial Force For Erin

Dublin, Irish Free State.—The ministry of defence announced a new territorial force would be established and its members would wear uniforms similar to those of the famous "Irish brigade" which Roger Casement, later hanged for treason, attempted to form in Germany for the 1916 Irish rebellion.

Feed Shortage In Ontario

Toronto.—The Ontario department of agriculture report livestock in most counties of the province suffering as a result of a serious feed shortage. Feed grains are particularly scarce, although supplies of hay and other roughage are adequate in most sections.

Given New Constitution

Self-Government For Ceylon With Safeguards

London.—Constitutional government in Ceylon stood trial in the house of commons, emerging battered but still holding the field, after the whole question of British government in the colonial empire had been threshed out in debate.

A novel experiment in colonial autocracy, Ceylon was given a new constitution in July, 1931, getting self-government with safeguards—somehow along the lines proposed for India. In the house, Sir Henry Page-Croft (Conservative), sharply attacked the scheme and demanded a parliamentary committee be appointed to inquire on the spot into its working.

Sir Henry's motion was finally talked out. So far from the Ceylon constitution breaking down, it was working smoothly, satisfactorily and with goodwill, asserted Malcolm Macdonald as acting colonial secretary.

Sir Henry protested against what he called "surrenders." Since the war successive British governments had been too ready to abandon their own people overseas, he added. "Have we lost our backbone?" he demanded. "We are shedding territories without any mandate from their possessors."

Sir Nairne Sanderson, another die-hard, said Ceylon was in the hands of politicians, and politicians were the curse of any country. The British policy of conciliation in Ceylon was merely taken for weakness, he said.

"What are we afraid of?" Sir Nairne asked the house. "Are we afraid to rule as we used to? Are we going to be bullied by the first person who comes along? We can purchase peace far too dearly."

Nitrate Shipments

Opinion Expressed That Nitrates May Be Used In Making Munitions

Colon.—Chilean nitrate shipments to Europe so far this year were shown in official figures to be 700 per cent. greater than those during a like period in 1933.

Canal zone shippers remarked about the increase particularly in view of the troubled European situation, and the opinion was advanced that the nitrates may be used in making munitions, although Chilean officials declared the shipments were for agricultural purposes.

Only 238 tons of nitrate were shipped through the Panama Canal in January, 1933, to Europe, compared to 146,167 tons in January 1934. Last February 33,259 tons were shipped.

Canadian Destroyers At Trinidad

Port of Spain, Trinidad.—Four Canadian destroyers paid a surprise visit to Port of Spain and sailed after rushing a rating to hospital with a broken leg. He was C. Blakey of Esquimaux. It was understood Blakey, a 29-year-old petty officer, was injured boarding a Caracas-Laguaira train while on shore leave.

PRaises Newspapers

In a recent speech at Ottawa, Dr. R. W. Boyle, head of the physical department, National Research Council, referred to a good newspaper as a "veritable university and a world-embracing education." He added: "Anyone who has observed the press over a period of years will have seen a growth in idealism, accuracy, honour, truth and fairness."

Land Settlement Plan

Movement To Assist Settlers To Take Up Land In Saskatchewan

Regina.—The Saskatchewan government will shortly launch a large-scale land settlement scheme, acting in co-operation with the railway companies and the cities.

Through arrangements with the railway companies, settlers are taking up raw land and will be allowed a four-year period free of the payment of principle or interest. Partially improved land will be subject to a two-year term clear of payment. Concessions have been granted on passenger rates by the railroads.

Unanimous endorsement was accorded to the plan by the mayors of Regina, Saskatoon, North Battleford, Moose Jaw, Swift Current, Prince Albert and Weyburn.

Regina has already taken steps to come into line with the proposal. Applications from relief recipients to come under the scheme are now being received by officials of the Regina relief board to be submitted to the government for approval when that stage of the plan is reached.

Socialist Paper Seized

Chancellor Dollfus Organizing New Hope For Austrian Working Class

Vienna.—Chancellor Engelbert Dollfus took his first step toward organizing a new life for the Austrian working class by placing the director of the official news agency in charge of the seized Socialist party publishing house.

Through the former official Socialist organ, the Arbeiter Zeitung, remodelled in conformity with the spirit of the new times, the government will endeavor to make it clear to workers "the government's Christian conviction makes it as a matter of principle the friend and protector of the working class."

Discipline In Jails

Hon. O. L. McPherson Defends Administration Of Alberta Institution

Edmonton.—Defending the administration in provincial jails, Hon. O. L. McPherson, minister of public works, declared here in the Alberta legislature that there was a great need for strict discipline in the institutions.

His declaration came in answer to a series of articles, purportedly written by an ex-prisoner and appearing in an Edmonton newspaper.

"I do not uphold brutal treatment, nor is it sanctioned in these institutions, but there is the greatest necessity for the strictest form of discipline, otherwise there would be riots, outbreaks, bloodshed and death," asserted the minister.

Answering "black-hole" allegations, he said that between April 1, 1931, and March 1, 1933, only 91 out of 3,463 prisoners passing through Fort Saskatchewan jail, named in the articles, received punishment in the form of solitary confinement for an average of 2.1 days each.

Moccasin Telegraph

Demented Indian Tied To Stake To Protect Family

Winnipeg.—The "moccasin telegraph" is swift but not always accurate. The central figure in a distorted story of death by torture was revealed as a kindly Indian who insisted on being tied to a stake to avoid the risk of harming his family in sudden fits of insanity. "His torturers" were neighborly braves who slept by his side and brought him food and drink.

The story of Gaagana, the Chipewyan, was told by Sergeant Percy Rose of the Royal Canadian Mounted Police. Early in December he was sent into the Lac Du Brochet country of northern Saskatchewan to investigate vague rumors a demented Indian had been tied to his sled and left to die in a recrudescence of "weteego" or witchcraft death. That story had spread all through the north. The sergeant found the Indian died of natural causes.

B.C. Loggers Get Sympathy

Vancouver Mayor Approves Request For Permission To Hold Tag Day

Vancouver.—"I'm with the strikers," declared Mayor L. D. Taylor in placing his approval on a request by striking British Columbia loggers for permission to hold a tag day in Vancouver.

"The industry has been taking advantage of an unemployment situation to have this work done cheaply," said his worship. "It is nothing more nor less than a racket and the sooner it is stopped the better."

Japanese Air Disaster

Tokyo.—Two naval planes crashed into a mountainside in a heavy fog near Heijo, killing five Japanese flyers, the newspaper Asahi reported here. This brought to 22 the number of fatalities in a recent series of army and navy air disasters.

NEW CHAPTER IS OPENED IN THE STAVISKY CASE

Paris.—The slaying of a prominent judge and a police announcement that Serge Stavisky may have been an international spy opened new chapters in the sensational \$40,000,000 Stavisky pawnshop bond swindle. The body of Judge Albert Prince, who had worked on several financial scandals and was to have been a witness in the Stavisky investigation, was found, mutilated, on a railroad track near Dijon. He was bound, and a bloody knife was found nearby.

Authorities revealed they were probing the possibility that "Handsome Alex" Stavisky acted as an international spy, selling secret information to Germany and using women agents.

Stavisky was the founder of the Bayonne municipal pawnshop whose recent collapse led to accusations of irregularities in connection with it among high-placed officials, to the downfall of two French cabinets, and riots that cost hundreds of casualties. Stavisky, the friend of many authorities, was found dead when police closed in upon him in his Chamonix retreat.

Police declared that Judge Prince, of the court of appeals, had been trapped by a faked telephone call that his mother was ill in Dijon, that he left Paris in answer to the message, and that he had been slain en route under mysterious circumstances.

Drive Against Bootleggers

U.S. Government Brings New Weapon To Bear On Illicit Trading

Washington.—Urged on by President Roosevelt, the administration has undertaken an intensive drive against high liquor prices and bootleggers throughout the United States.

The government has brought a new weapon to bear on the bootlegger, one designed specifically to wreck his modernized system of pouring the illicit product into legal channels. Treasury officials said this was the new stamp tax, which became effective a fortnight ago.

Under this law, every liquor container must bear a stamp. Behind the stamp is an elaborate inspection system and the provision that if it is not used or is illegally used a long prison sentence awaits the offender.

A State Of Mind

Psychology Rather Than Revolution For World's Ills

Washington.—The opinion that "psychology rather than revolution is the best instrument of adjustment" to new conditions throughout the world was expressed by Lytton Cromie, editor of the Vancouver Sun.

Addressing a luncheon in his honor at the National Press club, following a tour of Italy, Russia, Germany and China, Mr. Cromie also took occasion to "congratulate your leaders on what they are trying to do to speed up these adjustments."

Streamline Steam Locomotive

Ottawa.—A new model for a streamline steam locomotive has been made at the National Research laboratories. It has been so designed as to reduce the air resistance 33 per cent. and to lift the smoke from the stack clear of the cab. Particulars of the new locomotive were contained in report of the National Research council tabled in the house of commons.

Women's Franchise Defeated

Quebec.—Another six months' hold to a measure proposing women be given the right to vote in provincial elections was given in the Quebec legislative assembly by a vote of 52 to 25.

Toronto Daylight Saving

Toronto.—Daylight saving time from April 29 to September 29 was recommended for Toronto by the board of control.

HEIMWEHR TROOPS FOR VIENNA FIRING LINE

Trucksload of steel-helmeted and heavily-armed Heimwehr troops are shown speeding through Vienna on the way to battle against Socialists entrenched at strategic points in the city. Use of artillery became necessary later as troops found Socialists equipped with machine guns, grenades and rifles.

Let's Hope It's True!

A writer in Toronto Saturday
Night issues the following fore-
cast: "My prophecy is that Cana-
dian business will make great
strides during the next several
months and by midsummer the
general situation will be very much
brighter. We are going to see the
construction industry spring into
activity, the automobile industry
enjoying a near boom, the steel
plants, both heavy and light, more
active; unemployment so sharply
reduced that it no longer consti-
tutes a serious community burden;
manufacturers of consumer goods
producing as fast as they can; re-
tailers, if not selling as fast as they
can, at least a good deal faster
than they are now; and consumers
happily buying and consuming. All
will be confident happy days are
here again and hope to stay. The
only disturbing feature for the
consuming public will be the sharp-
ly rising prices."

Gossip Twisters.

How gossip rumors get started
is sometimes as puzzling and in-
teresting a mystery as anything
that may be in them, says The
Athabasca Echo. They always

grow as they go, and in many cases
originate in some misunderstanding
or twisting of what someone
has said or done. A typical in-
stance of the fatal ease with which
an overheard remark may be mis-
translated was narrated at a re-
cent meeting of the Sewing Circle:
Said Mrs. A., one of the over-
hearsers—They must have been to
the circus, because I heard her
mention "a trained deer."

Said Mrs. B.—No, no; they were
talking about going away; and
she said find out about the train,
dear.

Said Mrs. C.—I think you are
both wrong. It seemed to me they
were discussing music, for she said
"a trained ear" very distinctly.
A few minutes later the lady
herself appeared and they told her
of their disagreement.

"Well," she laughed, "that is
quite funny. You are poor
guessers, all of you. The fact is I
had been out to the country over-
night, and I was asking my hus-
band if it rained here last even-
ing."

Advances for Seed Grain.

Provision for advances for seed
grain, feed grain and fodder be-
tween Sept. 1, 1933, and June 1,
1934, and for securing the repay-
ment of any advances so made by
a charge on the recipient's crops
grown in 1934 and 1935, is made
in a bill introduced in the Legisla-
ture.

Subject to directions by the Min-
ister of Agriculture, any person
authorised by him to seize any
grain crop subject to any charge
under the Act, may sell the crop
at such price and at such time as
he may deem proper and shall not
be accountable for any loss occasioned
thereby.

Quebec Dog Derby Thrills

Names to conjure with in the dog sled derby
world are now on the lists of drivers who will
contend for the premier honors of the Quebec Dog
Sled Derby to be staged in the Ancient Capital,
February 23rd, 24th, and 25th. Emile St. Godard,
mighty musher from Le Pas, Man., will again match
dogs, stamina and wits against his great rival
Leonard Soppala, the Alaskan whose feats on the
trails are known the world over. St. Godard and Soppala, who are now training at Lacoma, N. H.,
will both meet strenuous competition from such famous mushers as Jack Defalco, of Ottawa, Fred
Wheeler, of St. Jovite, Que., and Raymond Rital, of Orient, Que. It is expected that the total entries will
run well over 30 teams.

The 129 mile classic is famous the world over, and followers of the great hearted dogs and gallant
drivers are arranging to make their headquarters at the Canadian Pacific Railway's Chateau Frontenac,
where special music, dancing and lighthearted gaiety will feature each evening during Dog Sled Derby
Week. Winter sport enthusiasts from European, United States and Canadian centers are this year more
than ever before making Quebec their winter playground. Skiing, tobogganing, curling and skating are
among the popular activities under the direction of Jack Strachan, winter sports director at the
Chateau Frontenac.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for wife. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is an adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety,

to keep a dinner engagement with Peter.
(Now Go On With The Story)

CHAPTER XXII.

Peter detected her electrified manner the moment he saw her, and thought he never had seen Camilla so lovely. He took both her hands in his, gently, and poured his love and adoration into her eyes with his gaze. "Camilla, I can't endure this—sweet agony of living without you any longer."

"Even the agony is sweet?" she asked.

"Yes, because I live every hour in the anticipation of seeing you again."

She smiled into his eyes, happily. "Then our plan is a huge success. That is just the way I wanted it to be. Don't you see, dear, if I were with you always, there would be no sweet agony of anticipation? And that would be tragic—very tragic for us. Half of the joy of life is anticipation."

He sighed with resignation. "Why do I argue with you about coming to me when I know I can't take care of you?"

"We're not going to argue about it, Peter. That's all settled. Besides, to-night is a very special celebration. I can't wait upon minute to tell you my secret, so let's go in and sit down where we can talk. Do you suppose we can get the same table we had on our wedding night? This occasion is almost as important."

"It must be important, if it makes you so beautiful. His eyes did not leave her face, as he took her hand into his arm and they entered through the gracious doorway of Charm Cottage again.

Camilla glanced up from the menu delightedly. "Here is the same special menu we had for our wedding dinner, Peter."

"Then that's what we're having. Okay?"

"It couldn't be better."

"Two special dinners," he said to the hovering waitress. "Now tell me," he folded his arms on the table and faced Camilla eagerly. "You have a position?"

"Oh, yes, but that isn't the best part of it," she exclaimed. "Let me begin at the very first and tell you everything!"

He laughed agreement. "Suspenses, thrills and all. It promises to be dramatic."

It was, he had to admit when she had finished. His heart swelled with pride for her success and ached a little with regret—not because he envied her, but because she was so ardent, so quick and precious that he wanted to claim his right to take care of her and spare her all the aroid demands and sacrifices which even so promising a future involved.

He knew that this sudden achievement flooded the whole world with a golden light for her, like the varied colored spotlights on the stage enhance soiled costumes, worn property and faulty makeup.

She had yet to learn that for every victory there is some defeat, for every joy some disappointment and heartache, for every task achieved endless hours of toil and anxiety. He knew that Camilla would meet these challenges gallantly, of course. But he wished that he might spare her any of the disillusion and could sort out for her only the sparkling gems of genuine worth, sparing her the bitter disappointment of synthetic substitutes which prevailed their majority in everything that belonged to life.

Camilla deserved to be treasured like a precious jewel, herself, yet she belonged to him and he could not lift a finger to protect her from the slightest need or anxiety. Rather, he had added to these. A fierce determination burned within him while he watched her happy face. He would give his soul to keep her happy like that, always, he thought.

Mrs. Hoyt accepted the news of Camilla's position and her departure from her home with resigned cheerfulness. She had not gained her objective, but to her way of thinking, Camilla would live to see the day when she would regret her rash determination to be independent and master of her own destiny.

In Mrs. Hoyt's past experience, youth profited by the wisdom of its elders or reaped the consequences of its folly. But hers was a mind that

dwelt in the past in agonized, social registers, inherited attitudes and blue-nosed conventions.

Her mind obstinately denied what her eyes bore witness to: proud names made ignominious and supported by plebeian worth, the rapid rise of a social order which regained ability above class, established fortunes tottering by the hour while new ones of magic-beanstalk growth replaced them, life that loved and laughed and snapped its fingers at smug convention.

She had been trying to fit a product of this modern age into the pattern of two generations before. No wonder she had failed to accomplish her purpose. Strange, that she had selected this child of foreign parentage to replace those denied her. Just another inconsistency of human emotions, that the beautiful little child had appeared so strongly to her motherless heart.

"I hope you won't think I am ungrateful if I leave you before the end of the summer?" Camilla inquired anxiously, after she had listened with calm patience to her foster mother's surprised comments upon her new position.

"But I don't see why you should. If you have to work in an office all day, it would be much easier for you to stay here until you are adjusted. For that matter, you need not leave here at all this year. We'd really like to have you with us, even if you are working for yourself." Her compromise was offered with more wisdom than she would have admitted to herself.

"That's very kind of you, but I prefer to do all the adjusting now and have it over with. I really could not feel as if I were independent so long as I lived here with you, in such circumstances as my salary could not afford. Besides, Rose needs me for awhile. I believe we can do a lot for each other while I am waiting for Peter to become established."

Mrs. Hoyt sighed heavily. "I'm afraid, Camilla, that never will be. A man has to have more than ambition to succeed, and Peter's opportunities are so limited. I don't know why."

"Please, let's not go over all that again," Camilla entreated. "I know why I married Peter, and I'd marry him again, even if I thought he had no chance. But he has. He does have more than ambition. He has talent, which will win out sooner or later."

Mrs. Hoyt's grieved eyes still accused her gravely while she resumed her tolerant acceptance of the situation.

"Just where do you propose to live, Camilla? I hope you will consider that you have been a Hoyt for most of your life." Already, she was reaching out tentacles into Camilla's future life, in an attempt to order it according to her desires, as she had done in the past.

"I don't intend to consider anything except the total of mine and Rose's salaries," she protested. "After all—I'm sorry—but it was you who changed my position from that of a Hoyt, even before I became Camilla Anson. That is what I shall have to be a working girl and the wife of a genius. I'll look for an apartment as near town as rents will permit, so that we can save time for house-keeping. Somewhere in the sixties or seventies, probably."

"But that's an impossible location," objected the horrified Mrs. Hoyt.

"How, impossible?"

"Why—so very common and unattractive. How could you endure living in such surroundings?"

"I don't expect to gratify my beauty-loving eyes for awhile. If we have a clean room in an agreeable atmosphere, it will do until we can afford better. That may be even sooner than we hope," she added optimistically, pulling a wide-brimmed Panama hat over her soft black curls that tinkled in the curious locks that persisted in peeping curiously into her face and shining eyes. "But I must hurry along and find just such a place to-day, so we can get settled tomorrow, rest Sunday and be ready to work on Monday. I'll have you at dinner."

(To Be Continued)

Grouch—"I hear that the football coach gets five times as much salary as the Greek prof. Isn't that quite a discrepancy?"

Student—"I dunno. Did you ever hear 40,000 people cheering a Greek recitation?"

It dissolves clogging grease—never harms the plumbing

WHY be annoyed by stopped-up drains? It's so easy to keep them clear and free-running. Simply sprinkle Gillett's Pure Flake Lye down each week. Use it full strength—it will not in any way harm the enamel or plumbing. It cuts right through all clogging matter—kills germs and destroys odors.

It's easy to be your own plumber this workless way, and you've no unwelcome bills to pay afterwards! Get a tin of Gillett's Lye from your grocer today. It will save you hours of unnecessary scrubbing and rubbing all over the house.

Never dissolve lye in hot water. The action of the lye liquefies the matter.

FREE BOOKLET—The new edition of the Gillett's Lye Booklet gives dozens of practical hints for saving time and work with this powerful cleanser and disinfectant; also contains full directions for soap making, thorough cleaning and other uses on the farm. Address Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

HERE'S THAT QUICK WAY TO STOP A COLD

Take 2 Aspirin Tablets.

Drink full glass of water. Repeat treatment in 2 hours.

If throat is sore, crush and dissolve 2 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets, Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross, is on each tablet. They dissolve almost

instantly. And thus work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely they leave no irritating particles. Get a box of 12 tablets or a bottle of 24 or 100 at any drug store.

DOES NOT HARM THE HEART

ASPIRIN TABLETS ARE MADE IN CANADA

Open Season for Beaver.

An open season for beaver in this province has been declared, as per the following announcement in the Alberta Gazette:

"Whereas an open season on beaver has been declared by the provinces of British Columbia and Saskatchewan, and North West Territories; and whereas a continued close season in Alberta would result in considerable bootlegging of beaver pelts; therefore, His Honor the Lieut.-Governor, by and with the advice of the Executive Council, has been pleased to order that the hunting and trapping of beaver in that part of the province lying to the north

Pitzler's Auction, March 7.

The Messrs. Ernest and Chris Pitzler will be offering by public sale their entire farm equipment on Wednesday, March 7, commencing at 10 a.m. The equipment consists of farm machinery, horses, cattle, household goods, etc. There will be no reserve on any article; everything will be sold, regardless. There will be no private sales of any articles. Watch for the date—Wed., March 7.

of Tp. 69, during the period of Mar. 1 to April 30 shall be permitted."

The Sun's Calendar.

- MARCH—
2—G. M. Hookey Broadcast; to be heard at Royal Cafe.
4—Hookey game at local rink.
4—Hookey game, Holborn rink.
6—Card party, Holborn hall.
7—Gigantic Sale at the Pitzler's Farm, at Inga.

United Church News.

The service at the United Church next Sunday evening will be a "Hymn Service." There will be singing of hymns instead of a sermon. The singing of each hymn will be prefaced by a two-minute talk on the circumstance in the life of the author which gave rise to the writing of the hymn. Also special selections by the choir.

Stony Plain and District

Mr Glen Carmichael leaves today for Smith, Alta., to take charge of a school.

Baker Trapp took a carload of bread up to Onoway yesterday.

An advt. elsewhere in this issue indicates the Provincial Government is offering, for sale that Main street corner, lot 1 block 10.

BIRTH—At the Royal Alex hospital, Edmonton, Tuesday, Feb. 20, to the wife of Rev. H. Kuring, a daughter, 9 1/2 lbs. (Eunice Marie).

The open season (north of the North Saskatchewan river) for trapping or hunting muskrat begins today and continues until April 30.

Pitzler Bros. sale on Wednesday, March 7th; no reserve. Get your trapper's license at The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

Brightbank News

Mr A Krause is getting his outfit ready for moving up to his new layout at Shoal Lake. His many friends here wish him the best of luck.

Mr J Becker was elected a trustee at the last meeting here of the S.D. rat-payers.

The good fishing prospects up at Bad Lake are attracting some of our farmers who like eating fish in Lent.

Mr A McDonald and W McKay have returned from the Rocky Rapids country, and report moose and deer very plentiful there. Some wolves were noticed feasting on the carcass of an elk, which they had apparently brought down.

Miss Susan Kyle was a Sunday visitor with friends in Brightbank district.

Alberta Government Telephones.

Tender for purchase of Lot 1, Block 10, Plan 4180R, Stony Plain.

Tenders addressed to the undersigned will be received up to 12 o'clock noon of Monday, March 12th, 1934, for the purchase of property described above.

Tender must be accompanied by an accepted cheque for the price offered.

The highest or any tender not necessarily accepted.

J. D. BAKER,
Deputy Minister of Telephones,
Edmonton, Alberta.
Dated at Edmonton,
February 27th, 1934.

Hospitalization.

Toward the close of the Saturday meeting in the Town hall Mr E. Pinchbeck, on request of Chairman W. Isen, gave a very comprehensive review of the question of "Hospitalization" as it would affect residents of rural municipalities. He stated that the matter now under consideration was the coupling-up of the rural municipalities contiguous to Edmonton City, such as Ray, Sturgeon, Strathcona, Liberty, Black Mud, Spruce Grove, etc. Several meetings of the committee had been held, and they had been able to secure favorable terms from representatives of City hospitals. A figure of 75c per-patient-per-day was mentioned; this figure being exclusive of operations, x-ray or other treatments. An effort will be made to get Inga Municipality to co-operate with the others. It is probable the matter will be dealt with by the incoming Council.

Christian Science.

At all Christian Science Churches next Sunday, March 4th, the subject of the Lesson Sermon will be "Christ Jesus." The following is one of the Scriptural quotations contained in the Lesson Sermon: "And when he was demanded of the Pharisees, when the kingdom of God should come, he answered them and said, The kingdom of God cometh not with observation; Neither shall they say, Lo here! or lo there! for, behold, the kingdom of God is within you" (Luke 17, 20-21). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 248): "Let unselfishness, goodness, mercy, justice, health, holiness, love—the kingdom of heaven—reign within us, and sin, disease, and death will diminish until they finally disappear."

Holborn Happenings.

At the last meeting of Holborn UFWA, with 25 members present, presentations were made to Mesdames E. and C. Pitzler, as tokens of appreciation for their unceasing efforts to forward the work of this worthy cause. Mrs F Williams, the president, made the presentation in a speech appropriate to the occasion. Short speeches, in reply, were made by the two recipients. The delegate to the annual convention (Mrs W T Propp) gave a report of the doings there, and was tendered a vote of thanks.

The new Farmers' Telephone System is giving great satisfaction, and new patrons are joining up almost daily.

The daily greeting now is "Meet me at Pitzler's sale, Mar. 7.—S.P.S." Holborn Junior League held its social meeting on Sat. 24, with a fair-sized crowd in attendance. It was decided to put on a Novelty dance Friday, March 16, a Saint Patrick's dance; everybody come. Partridge's snappy band supplies the music.

A Community card party will be held Tues. March 6; playing to start 8 sharp.

Due to the cold weather, Wintburn's hockey team was unable to play against Holborn; team on the river rink on the afternoon of Sunday last, the 25th. The team is expected to arrive and play on Sunday next.

Miss Nylands spent the weekend at her home in Edmonton.

Several more of the Holborn grain raisers intend giving Elephant Brand Fertilizer a trial this season.

Spurce Grove News

Grades X and XI of the Spurce Grove Rural High school distinguished themselves by providing their school mates with a most enjoyable program of fourteen numbers on Friday last. Great credit accrues to these pupils in that the whole production was their own, without any assistance from outsiders or from their teacher.

It were invasions to mention particular names. Alan Ripley as chairman, with Rosie Schwindt and Gertrude Poetsch as accompanists, supplied a good background. The vocal numbers were tuneful, apposite, and well delivered. The dialogues were well presented, and went across with eclat. Stage scenery and costumes were well chosen.

A brief interval during which members of the caste distributed refreshments divided the program into two sections. Number followed number without any undue delay.

A hearty vote of thanks was proposed by the Grade IX leader Mary Schiebline, bringing to a close a profitable and enjoyable afternoon.—L.L.P.

Members of United Ladies Aid are holding their regular monthly meeting today, Mar. 1st, at the home of Mrs R N Sherwin.

"Sport" Clendening motored out from the City Friday afternoon and spent the week end with M McKean the 2nd.

Neighbors and friends gathered at the home of Mr and Mrs G Disterhoft on Monday Evg. the 28th to participate in a "surprise party" in honor of Mr Disterhoft's birthday. Among those present were: Mr and Mrs G Footz, Mr and Mrs L Schwindt, Mr and Mrs P Schram, Mr and Mrs Louie Javorsky, Mr and Mrs John Wettlaufer.

Mrs John Willie, accompanied by Emily and George, motored up from Lacombe last week and are visiting with Mrs P H Goebel.

Ford V8 autos seem to be gaining favor among the local autoists; the most recent purchases being Rev C Keenan, who is now sporting a new coach.

Mr J H McLaughlin, agent for Elephant Brand Fertilizer, has started the spring campaign on this well-known producer of good crops.

Mr Dan Brox, with a number of other oldtimers of this district, attended the Willie funeral on Monday.

Th Wudel, Div. 3, was re-elected councillor at the nomination meeting last week for Councilors in Spruce Grove M. D.
